Unspecified Prescriber

Tamsulosin HCL : 0.4 mg, take 1 pill 30 min after same meal each day

Comments**COVID-19 (U07.1)**

Your test today is wildly positive for the COVID virus infection. This explains your symptoms. Happily, you are oxygenating well with your supplemental oxygen your pulse ox is 99%. Your lungs do have the crackles that go along with your chronic lung condition. You appeared to be within the 5-day limit for getting the Paxlovid. Lets get that started immediately.

You do have active covid infection. At this point, your infection is mild. Do isolate and rest at home for 5 days. If, towards the end of that period, you develop a fever, you will need to isolate until at least 24 hours

To Whom It may Concern,

I am unable to drive to drop off this paper work for Chapter 13.

I have Covid 19 and can not get rid of it.

I can't drive and every thing is hectic. but I know today is the dead line

So I am sending via mail. I know things are not right but I am trying. Will have a lawyer by Friday 9-1-23

Thank You
Dennis J. Grier Sr
